### 7. Floating Series Segula

Featuring the latest LED technology including the patented soft filament – the Floating Series is not only efficient and economical but also innovative in design. Fully dimmable, creating warm light colours in different glass variations, the fixture size ranges from small reflectors to large globes in stylish smoked glass with 200mm diameter.

### 10. Kempleford Tekna

Kempleford, one of Tekna's new lighting fixtures, is part of the Arton collection, which focuses on an audience that loves striking, unique design lighting. The dimmable pendant in brass, with glass outer and inner tube, is 154cm in length, with a projection of 74mm - the height at which the pendant hangs can be specified by the customer.

### 8. Veer SkLO

The Veer pendant makes use of a four-armed brass assembly, each ending in an individually lit handblown spherical glass diffuser. The arms are short and extend in different directions, creating a compact but organic composition. Available in two sizes of glass 11cm and 18cm diameters, and five different colours.

### 11. Q-Bot Tightrope

This spider-like chandelier can work as a series of spotlights, downlights, and uplights using the ceiling as bounce for a diffuse light. Made from brass and mild steel finished with eco-friendly black patina, the lights are fitted with brass swivels to position each light in any direction. Available as a four and six light configuration with dimmable LED sources.

### 9. Purolinea 360 Sonneman - A Way of Light

A system of linear tubes set within the geometry of surface-mounted cylinder brackets that rotate individually to direct the illumination in 360° along their axis. Arranged in a linear pattern or along a single path, the possibilities for compositions are endless. The system can transition between wall and ceiling mounting using corner connectors.

### 12. Ray Wave Murano Glass

Ray, designed by Terence Coton, is a lamp made of Murano glass encased in a metal box. The lantern can be used as a table lamp or floor lamp combining the modules with a magnetic system. The cone creates a play of lights and colour and is opaque with a vertical and transparent cut that reveals the underlying light.
